PROFILE

Information Technology student at HCMUTE building reliable backend services and practical AI systems. I focus on clear tool boundaries, controlled execution, useful memory, observable workflows and secure-by-design behavior.

SELECTED PROJECTS

CV-Agent

AI resume analysis and optimization platform using Google Gemini, Express, MongoDB and React.

MissLost

UEH lost-and-found platform with real-time chat, verified returns, NestJS, Next.js and PostgreSQL.

VibeTDU

Interactive virtual chemistry lab built with Spring Boot, Next.js, Gemini integration and Zustand.

WeatherForecast AI

ML prediction, alerts, analytics, maps and chatbot support using Spring, TensorFlow, Redis and PostgreSQL.

ENGINEERING EXPERIENCE

- Designing REST APIs, service layers and persistence around maintainability and debugging.
- Building agentic workflows that select tools, call external services and return structured results.
- Exploring memory, state management, prompt design, guardrails, evaluation and observability.
- Practicing web security and vulnerability analysis through Burp Suite and hands-on labs.

EDUCATION

2024-PRESENT

HCMUTE Information Technology

Focus: Backend Engineering and Information Security

2021-2024

Hung Vuong High School for the Gifted
Specialized in Informatics

HIGHLIGHTS

2023

Third Prize in School Science and Engineering

ASEAN

AABW AI Agent Build Competition
participant

TECHNICAL SKILLS

LANGUAGES

Java, Python, JavaScript, TypeScript, C, C++

BACKEND

Spring, NestJS, Node.js, REST APIs

DATA

PostgreSQL, MongoDB, MySQL,
SQL/NoSQL modeling

AI

Agent workflows, tool calling, memory,
guardrails, evaluation

SECURITY

Burp Suite, TryHackMe, Hack The Box,
Root-Me

TOOLS

Git, GitHub, Docker, Vercel
